

ろけます！白垂の神殿と紺碧のエーゲ海ギリシャの旅 さざなみ壊変

page	Japanese	English
2	アイドルマスター ブラウザ用IDO	Travel with Imas IDOLM@STER Cinderella Girls for browsers has been announced that the service will end on March 30, 2023. As for this magazine that has been around domestic and overseas with idols, I have been reporting to the end as much as possible because I have been reporting what the stage of idols is.
2019年8月末		The in -game event "IDOL PRODUCE White and Blue Greece" held at Cinderella Girls from the end of August 2019. We will interact with five people, Tomoka Wakabayashi, Chie Sasaki, Miyuki Yanase, Komatsu Ibuki, and Tsukasa Kiryu, around the magnificent white historical buildings and the islands of the Aegean Sea with a white wall in a deep blue sea.
新型コロナウイル		We delivered the ancient archeological site in the birthplace of the gods and the Azure Sea (and Austria), which we visited in August 2021, where the spread of COVID19 continued.
神話ときらめきの		Athens, the capital of the country of myths and sparking. As you climb the huge hills of a huge rock, a divine white temple, Partinon, who received the morning sun, appeared. I finally arrived at the world's most famous building.
4	パルテノン神殿を	[Hidamari in Southern Europe] MIYUKI YANASE+, which reports the temple of Parthenon, has almost accurately reproduced the temple in the composition seen from the southeast direction, but there are actually scaffolds and cranes for repair work.
5	アクロポリスの丘	Acropolis hills and white temples Athens, Greek capital, the oldest city in Europe and the birthplace of European culture. In the city of Athens, which was established around the 8th century BC, the temple was built one after another in Acropolis, which means "high -sized fortress," and became a fortress and sanctuary. Once devastated in the Persian War in the 5th century BC, it was rebuilt with stone, which remains from wooden structures, and a 12-meter -high statue of Athena, a goddess of Greek mythology, is a 12-meter -high statue of Athena. In an era under the control of the Ottoman Empire, the Great Turkey War broke out by Austria and others. The Palttenon, which had been a gunpowder when the Venice Republic attacked Athens in 1687, broke. The restoration has been performed since 1975, and the construction has continued.
ヨーロッパ最古の		IDOLM@STER Cinderella Girls' "IDOL PRODUCE White and Blue Greece", which is the second of the four areas "Athens and archeological sites" is the symbol of Athens. It is the Partinon Temple. The composition of the temple from the southeast direction is almost reproduced in the appearance of being destroyed and ruined. Although the traces of the pillar parts embedded by embedding white new marble and repaired, the background illustrations are emphasized, but when I visited in 2021, the new marble was also oxidized and the color changed. There were many parts that were familiar with the color of the pillars.
ブラウザ用IDO		[Northern Hidamari] MIYUKI YANASE +, which reports the situation of the temple, is also drawn from almost the same angle, but as in the case of background illustrations, cranes and scaffolds that perform restoration work are omitted.
神殿の様子をリポ		Miyuki from Hokkaido reminded me of Hokkaido when I saw it when I was a child, saying, "It's so wide and it's close to reach it, but when the Greek sky in the summer is wrapped in a deep blue sky, it is inhaled. It was going to be.
北海道で生まれた		A whole view of the Parthenon Temple used in the Athens Archeological area. There is a museum behind, and it is not possible to fall any further behind, so it is not possible to completely match the composition, including the perptete.
「アテネ・遺跡」		Big stone dropped by Athena
6	アテナが落とした	Licavitos hill, located northeast of Athens and is about 300 meters above sea level in the city. It is said that the goddess Athena was inadvertently dropped during the Acropolis construction, and at the top has an observatory, the Church of the St. Georgios, the bell tower, and a restaurant. You can overlook the city of Athens and the Aegolopolis hills to the Aegal Sea, and in the summer of strong sunshine, you can enjoy 360 degrees panoramic while cooling in the evening.
アテネの北東に位		MIYUKI YANASE, who looks at the scenery with Greek yogurt in one hand, is the observatory of the Hill of Ricavitos. The handrails to prevent falling and the hills of Acropolis that spread under the eyes are almost reproduced, but when I visited on the sunset, it was crowded with tourists, and it was impossible to shoot without people. Everyone seemed to be enjoying the dynamic Southern European landscape that is as good as the sunset created by the magnificent land of Hokkaido.
ギリシャヨーグル		A cable car that seems to have used P because it also appears in Miyuki's lines. Go through the tunnel and quickly reach the top.
7	柳瀬美由紀のセリ	A hill of Ricavitos seen from the Acropolis hill. The characteristic -shaped rock -shaped hills stand out from the city of Athens.
アクロポリスの丘		[Hidamari in Southern Europe] The observation deck and the scenery of the Hill of Ricavitos, where MIYUKI YANASE stands, is well reproduced.
柳瀬美由紀が付む		[Fosmatis] Minami Nitta + is drawn by the Blue Dome Church in the Santorini Island, but a huge building is drawn.
8	新田美波の背後に	Church with a blue round roof in the la area
9	イア地区の青い丸	The Aegean Sea is surrounded by countless islands surrounded by the Balkan Peninsula and the Anatolia Peninsula in Turkey in the Mediterranean. Around 1500 BC, the explosion of the volcano sinked the center of the island and became the current crescent form, and it was said that it was a phantom Atlantis continent because the advanced civilization flourished but disappeared steadily. Is Santorini Island I visited this time. The cliffs made of volcanoes are lined with lime -painted houses, and the high contrast that spreads the blue sky and the sea is said to be the most beautiful island in the world.
地中海の中でバル		Although it has not appeared in IDOL PRODUCE, Cinderella Girls, a browser Cinderella Girls, who visited Santorini Island in Greek overseas, has a blue circle ceiling in the la area in the northern part of Santorini. The church is drawn. However, on the right side of Minami's face is a huge church building that does not exist. The church would be hidden behind Minami, so it would have been drawn to emphasize. In the Starlight Stage Fes Limited SSR, a grass one hand shows a reminiscent expression [The goddess is in the sunrise sea] Minami Nitta is also on location on Santorini, so it can be said that it is an idol with a lot of Greece. The Blue Dome Church and the cityscape on the right are arranged and drawn, and there is no building on the left side of Minami, so there is no doubt that Santorini Island is definitely referred to, but Minami eats a restaurant or cafe. It does not exist.
アイドルプロデュ		[Helenic Roman] It seems that Ibuki Komatsu is probably Santorini's shopping for souvenirs, and his hand has an eco -bag with a circular blue ceiling building on a white wall. In the Fira district of the la area and the Fira area in the center, you can see the eaves of shops and cafes on a path with stairs, and walk through the superb view of the cliffs and the maze to enjoy a resort feeling.
[ヘレニックロマ		A shopping street in the Fira area. [Helenic Roman] It is unknown whether Komatsu Ibuki has a specific model, but you can see the scenery that looks like that.
フィラ地区にある		Dereste's [The goddess is in the sunrise sea] Minami Nitta is also arranged quite well, including the cityscape, but the Blue Dome Church in the Fira district.
アイドルマスター		Cafe for the Blue Dome Church
10	ブルードーム教会	[Shiny Days] At the terrace seat of a restaurant where you can enjoy a superb view like Arisa Matsuda+, you will have a Greek summer drink flappe.
松田亜利沙と同じ		I still got a tomato omelet in the morning. Santorini is a specialty of tomatoes due to volcanic ash soil, and Omelettes wears Greek yogurt.
まだ午前中のため		Fira district. In the harsh Aegean Sea, you can enjoy a unique Greek coffee and cliff without filtration.
フィラ地区。暑さ		Metropolitan Orthodox Cathedral of the Greek Orthodox Church, the largest in the Fira area. A white building that shines in the Aegean Sea and has a visant style dome roof.
11	フィラ地区で一番	Greek flags and four bells facing Tiracia Island. The la area becomes a picture no matter where you cut it.
ティラシア島を臨		Looking up at the Fira area from the old port down the cliff with a donkey or cable car.
ロバカケーブルカ		Cliffs that dye from citrus color to light pink
12	柑橘色から薄桃色	The la area is located in the northern part of Santorini. On a 300 -meter -high cliff, a white lava steep slope spreads on a white lava.
サントリーニ島北		The fairy and photogenic Ia appears as the background of the fourth Santorini area in IDOL PRODUCE. The motif of the scenery seen from the Agios Nicolaos Fortress in the old castle, which is a famous sunset viewing spot, is well reproduced, and the characteristic powdered hut windmills are well reproduced. However, if you look closely, you can see that there is a synthesis of drawing and adding the Blue Dome Church in the Fira area. Submitting a coffee flappe [Azure Idea] Kiryu Tsukasa + also depicts the houses on the slope dyed in the sunset, so it seems that the motif of Ia's sunset is a motif, but the building is not similar and it is really Ia. It is not clear whether it is.
メルヘンチックで		[Azure Idea] Tsukasa Kiryu+seems to be the la area, but the cityscape does not match at all.
13	[紺碧のイデア]	The background of the "Santorini Island" area, which synthesized the Blue Dome Church in the Fira area in the sunset of Ia.
イアの夕陽にフィ		It seems that there is no exactly the same place as the background of the "Mikonos" area, but there are many places in Mikonos Town.
14	「ミコノス」エリ	Aegean jewelry box floating in the Sea
15	エーゲ海に浮かぶ	Like Santorini Island, Mikonos is located in the Kikrades Islands, which is the center of the Aegean Sea, and the legendary Greek mythology Hercules fought against the giants. It is a white jewelry box floating in the Aegean Sea, with the eaves of the white walls crowded. The walls of the building are painted pure white to the back of the narrow alley, and the doors and fences are colored red and blue. The blooming Bougainvillea flowers and the colorful souvenirs displayed outside were like scattered jewelry, as if they were lost in a miniature miniature garden.
サントリーニ島と		

アイドルプロデュ	The third "Mikonos" area in IDOL PRODUCE is based on the motif of Mikonos Town in the center, reproducing the cityscape that looks like a maze with white walls and cobblestones.
【紺碧のアイデア】	[Azure Idea] Kiryu Tsukasa is also thought to be Mikonos Town because of light blue doors, fences, boogenvillea, etc. There was no place to match.
白い壁に映えるブ	Miconos Town blooming Bougainvillea that shines on a white wall. [Azure Idea] There are many streets similar to Kiryu Tsukasa, but it seemed that the same place was not completely the same.
小高い丘の上にあ	The view from the vicinity of Ano Mill's hill on a small hill is a superb view such as "a white jewelry box floating in the Aegean Sea". The left side of the photo is the center of Miconos Town.
16 【ヘレニックロマ	[Helenic Roman] Kato Milli's windmill of Komatsu Ibuki+. The location of the location is high and almost the same.
ミコノスのシンボ	Mikonos symbol
ミコノス島はメル	Mikonos Island is famous for its strong wind called Mertemi, and high -speed boats are often canceled, but used to make wheat flour using the sea breeze peculiar to the Aegean Sea. Even today, many white powdered huts are lined up, making it a symbol of Mikonos Island, where relaxing time flows.
【ヘレニックロマ	[Helenic Roman] The place where Ibuki Komatsu + shows the hand -riding windmill and meets the report is a Kato Milli windmill with six windmills along the Mikonos Town. The composition from a commemorative photo spot where all six units can be seen side by side near the parking lot can be seen that the white walls that separate the sidewalks and the sidewalk are generally reproduced.
コロナ禍のため	Because of COVID19, there were no Asian tourists and the vacation was around the end, so there was no congestion, so I felt the sound of the waves of the Aegean Sea and the gentle sea breeze, so I was able to immerse myself in a romantic atmosphere.
17 小高い丘の上から	Looking down on the Kato Milli windmill and the Aegean Sea from the top of the small hill.
風車がよく見える	Little Benis is located on the coast where you can see the windmills. It seems to be a great spot to see sunset and sunrise.
18 中欧の音楽の都	Central European music capital
巧みな婚姻政策で	The Capital of Austrian capital, which has a skillful marriage policy, has expanded its power throughout Europe and has greatly expanded its glory in its spectacular palace and gardens, and is the capital of music and art, where excellent musicians gather.
2022年2月末	At the end of February 2022, it was distributed as a Bran festival limited SSR at the Starlight Stage [Symphony on the tour] Yukari Mizumoto. Yukyo, a hobby of flute, runs in a carriage in the city of music near Michaelerplatz, the center of the Vienna History area, next to the former Royal Palace. If you look at the background, you can clearly see that the building and the spire of the St. Michael Church in the square are drawn. A carriage with a Yukari is waiting in the square, and it is the starting point of the old town sightseeing.
対して、特訓後は	On the other hand, after the special training, he performed live in the "historical church", but I looked back at photos of Mozart's wedding and the funeral church where the funeral was held, but there seems to be no specific place to match. was.
19 【巡り巡るシンフ	[Symphony around] The tip of the carriage related to Mizumoto is Michael Square, and you can see the St. Michael Church.
ウィーン旧市街の	Stephen Cathedral, a symbol, located in the center of the old town of Vienna. First of all, I thought it was here, but the interior was completely different.
ウィーンの教会を	I examined some of the Vienna churches, but [Symphony around] Yukari Mizumoto + did not find a model church.
ホーフブルク宮殿	Hofburg Palace is integrated with the church.
バロック様式の聖	Baroque style St. Peter Church.
20 アテネのモナステ	Athens's Monastiraki Free Market and ancient Agora are lined with stylish restaurants that can be eaten while looking at the Acropolis hills lit up at night. I want to enjoy Greece, which has a cheap price from 12 euros for a set meal.
オリーブ、チーズ	Greek dishes with plenty of olives, cheese, tomatoes, etc. As the nutritional balance is well -balanced, we want to fully enjoy the blessings of the Mediterranean, the sea and the earth, as the "Mediterranean diet" is registered as UNESCO Intangible Cultural Heritage.
【神秘的エーゲ海	[Mysterious Aegean Sea] Greek salad eaten by Tomoka Wakabayashi+. There are many feta cheese made from sheep and goat milk.
伊吹と一緒に食べ	A classic Musaka of home cooking that I ate with Ibuki. Lasania with meat sauce and parmesan cheese with eggplant and potatoes.
つかさがアイテム	Saganaki is a Tsukasa as an item. In the sense of a "small frying pan", bake cheese until it is browned, and eat it with bread, etc.
エーゲ海と言えば	Speaking of Aegean Sea, sea products! A fresh squid grilled karamari in Mamas House, where you can eat traditional Greek cuisine in Fira on Santorini. The fried fried karamari is also a standard.
21 ブドウの葉に米・	DOLMADES is packed with rice, meat and vegetables in grape leaves. It can be eaten widely from Central Asia to North Africa from the origin of roll cabbage. The photo shows canned rice pickled in olive oil.
粉末のコーヒー豆	Greek coffee is boiled in a pot with powdered coffee beans in a pot and put in a small cup without using a filter. Wait for the particles to set, and then drink the supernatant.
水切りで乳清や水	Greek yogurt, which removes milk cleanliness and moisture by draining, is hard and has a rich and neat taste. Summer is a substitute for ice, and it's fun to choose colorful toppings.
ギリシャ語で「伝	Lager beer Mythos, which means "legend" in Greek. ALFA beer and the oldest FIX beer are standard.
古代ギリシャの壺	Ancient Greek vase
【神秘的エーゲ海	[Mysterious Aegean Sea] CHIE SAKI + has an ancient Greek pottery called Anfora, which has two handles. Chie said, "I want to put a large flower and decorate it," but it was actually a pot for transporting and preserving food and drink. The technique called a black statue type from around the 7th century BC was used, and the hero of Greek myth was often drawn, so I found out what the vase plants of Chie had.
紀元前6世紀初頭	Black statue amphora in the early 6th century BC. It is a collection of the National Archeology Museum in the southern Tarlant Italy, and many of the exhibits were from ancient Greece.
22 アテネの雑多な商	Athens's miscellaneous shopping street
アテネ国際空港や	Monastiraki is a subway station that connects Athens International Airport and Pireas Port, which is the gateway to the Aegean Sea. The west of Monastiraki Square in front of the station is connected to Monastiraki Free Market. Even though it is a flea market, it is a shopping street for tourists, and it is full of souvenirs such as clothing and handicrafts, creating a miscellaneous atmosphere, and is crowded with customers who enjoy the end of the vacation even in the corona. rice field.
Idol Pro	In IDOL PRODUCE, it appears as the first "Athens Flea Market" area, and although there is no place that matches completely as the reality, the lid of the drainage path flowing in the center of the street and the atmosphere of the shopping street where people come and go. It is done. It is possible that the building is synthesized with Adrianou Street in the Placa area, located southeast of Monastiraki.
身長より高く陳列	Products and crowded streets that are displayed higher than height are reminiscent of emerging markets.
23 編集後記	Editing postscript

今回の旅は202

This trip was inoculated twice in the vaccine in August 2021 and escaped from the country immediately. Germany (transfer only) → Finland → Estonia → Latvia → Poland → Croatia → Italy → Greece → Austria → Moldova → along It is when I went around with the Republic of Doniestl → Ukraine → Poland → Austria → Denmark. It was a difficult trip to travel to 18 cities in 14 countries in 18.5 days, but it was my first experience to decide where to go while watching tickets and other places. The visiting route in Greece and Austria is transferred from Dubrovnik, Croatia in Rome, Italy, flying to Santorini on the LCC EASYJET early in the morning, sightseeing Ia and Fira, and crossed to Miconos on the next morning by high -speed boat. After staying for 5 hours, I went to Athens by ferry that day, and after staying for 2 nights, flew to Vienna, Austria. In the first Austria, I stayed in Vienna for 2 nights, sightseeing Salzburg on a day trip, flew to Moldova the next day, traveled by international train from Kisinau to Odaisa in Ukraine, and flew to Krakow, the former Polish capital at Ryan Air in LCC. I returned to Austria by train and returned to Japan via Denmark, doing PCR tests and sightseeing in Vienna during my stay for 2 nights in Vienna. I miss my three days at the hotel and returned home by shared bicycle.

6～10月はヨ－

From June to October, direct flights to Santorini and Mikonos are operated from each city in Europe, and there are high -speed boats connecting Athens → Miconos Island → Santorini. If you avoid the vacation season, you can travel cheaply by LCC and the hotel is relatively cheap, so if you remove the peak, you may enjoy it slowly. In particular, the Ia area of Santorini Island has a high hotel, so I stayed in Fira and moved by bus to Ia. Mikonos was a pity that I couldn't see sunset or sunrise because I couldn't find an affordable inn alone, so I went to Athens without staying. In addition, Greece, which once experienced the economic crisis, was cheap, so hotels and eating out could be used in the same way as in Japan, but some people overcome the automatic subway ticket gate and stand in the city. The security was bad, such as seeing many people.

国内外のアイドル

The "Rokemasu!" Series, which introduces the IMAS stage in Japan and overseas, has been a total of 24 books, starting with the 0 of the preparatory issue, 20 books in this issue, two omnibuses, and two extra editions. The service of the browser SIDEM on January 5, 2023 and the Cinderella Girls for the Browser on March 30, and the wide variety of project IMAS, making it difficult to handle location locations in magazines. Due to this, the regular issuance of the "Relaxed!" Series is being considered for new forms, such as shifting on the web at the end. Especially if there was no Cinderella Girls for the Browser, the work called iMas may have been a long time ago, and I did not think that the "Rokemasu!" Series would continue for more than 10 years, so I traveled around the world with idols. I learned a lot of things. Thank you for your support so far.
